DETAILED ACTION

1. This Office Action is the answer to the response under CFR 1.116, received on 10/28/2004.

2. Claims 21-25 are pending. Claims 1-20 were canceled.

Allowable Subject Matter & Reasons for Allowance

3. Independent claim 21 is patentable over the closest references of Ogasawara, and Acampora et al., because these references do not anticipate nor fairly and reasonably teach a method of automatically recommending transactions to a customer traveling through a venue in which the transactions are offered, comprising a step of:

- positioning access nodes of a local area network at fixed, spaced-apart locations throughout the venue, each access node being in proximity with a different supplier of the transactions being offered at the venue, each access node having a wireless transceiver in wireless communication with the transceiver on the terminal when the customer is in proximity with the respective supplier proximally located to the respective access node.

4. Claims 22-25 are allowed because they are dependent on base claim 21.

Conclusion

5. Claims 21-25 are patentable; they are renumbered as claims 1-5.
